

# Enable Rapid Retail Onboarding with Digital Identity Services

In today's competitive talent market, you can't risk delivering anything less than exceptional experiences to your customers. Whether you own a single business location or operate multiple outlets – creating memorable customer service starts with smarter hiring and faster onboarding of top talent who can help further your service objectives.

First Advantage's remote digital check services enable applicants to submit their identification documentation more efficiently and affordably.

## Hire Smarter

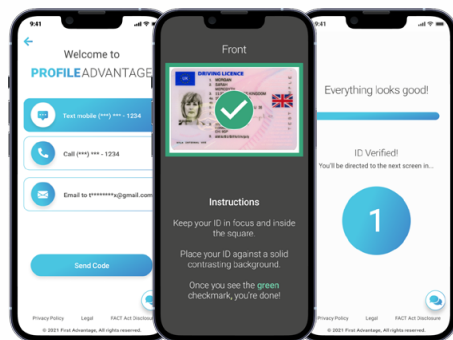

All digital identity solutions are not the same. Some offer different routes for different types of applicants or broader background screening services. But First Advantage delivers multiple solutions to enable faster and easier processing of RTW and DBS checks.

Hire Smarter means working with advanced technology to make the applicant experience as quick and painless as possible. Use First Advantage's digital identity solution to help fulfill RTW checks.

## How It Works:

A digital-first mobile journey designed to check identities by leveraging key technology capabilities, including:

- Document capture
- Selfies
- Biometric chip data reading
- Liveness check
- Facial recognition

Check results are cross-referenced with data from sources to support rapid, and compliant checks.

Digital identity can be used to conduct a robust identity check or to attain sufficient levels of assurance set out by the UK's Digital Identity & Attributes Trust Framework and enabling remote UK right to work or DBS checking. For applicants who prefer to visit a physical location, we also provide access to the UK's national Post Office network; enabling applicants to visit their desired location.

## 33% UK Retail Employees

Left the retail sector in 2022 YTD.

# Enable Rapid Retail Onboarding with Digital Identity Services

## Raising The Bar For Identity Checks

With First Advantage's remote digital identity checking service, you get an efficient and easy to use applicants journey, with near real time results returned to employers via a dashboard. Check identity digitally by confirming documents are valid, authentic and belong to the individual for which the check is being conducted. Data is accessible via a simple dashboard and audit trail.

## Onboard Faster

Enabling identity and background checks that are as smart as they are fast helps foster a seamless applicant onboarding experience that's well ahead of the competition. A digitized process that doesn't require a physical presence when showing documentation can significantly reduce your time to onboard. You're one step closer with First Advantage's digital identity solutions.

## Switch to Digital Identity Solutions Today!

With an easy-to-deploy mobile journey, our intuitive help desk and client care teams are also on hand to support job applicants and hiring managers through the process.
