

Mobile Identity Checks on Virtually Any Device

Mitigate Potential Identity Fraud

There's a new victim of identity theft every two seconds¹. While employment identity theft scams aren't necessarily new, they are becoming more common as new fraud schemes emerge. Leveraging advanced technologies like artificial intelligence and machine learning, RightID is designed to help identify and deter fraudulent applicants.

Speed Up Candidate Processing

Recruiting, hiring and retaining top talent is a complex and time-intensive job, but it doesn't need to be. Let First Advantage make securing quality applicants quick and easy. With RightID™, an effective, mobile identification tool to streamline onboarding, you get assistance with comparing the identity of your candidates against their government-issued IDs in less than two minutes, reducing the need to perform other cumbersome, time-consuming checks.

Onboard with Confidence

Without reliable recruitment processes, you may be faced with high turnover. Especially when combined with verifiable, knowledge-based candidate questions, RightID gives you the added confidence that improves your chances of onboarding the right people the first time. RightID is the perfect complement to your existing fraud mitigation measures.

Every Second Matters

- **Every 2 seconds** there is a new victim of identity theft¹
- Help guard against identity fraud in **less than 2 minutes** with RightID™

Modernize Your Onboarding

Today's business workflows happen across devices—your onboarding processes should keep pace. The use of First Advantage's mobile background screening app **increased 147%**—a trend that's growing as more candidates want the ease and convenience of mobile.

1.5 Billion Records Exposed

According to the Identity Theft Resource Center (ITRC), a staggering 1.5 billion records have been exposed since 2005 affecting **over 16 million victims**.

with
Confidence**

How It Works

RightID flags potential inconsistencies in a candidate's actual versus claimed identity. It uses government-issued IDs and selfies to help reduce identity fraud. The process is simple—here's how it works:

Smartphone Savvy

Applicants receive an invite and sign up, scan IDs and take selfies

Document Validation

OCR and AI technologies help by adding a confidence level concerning authenticity of IDs

Advanced AI

RightID leverages facial recognition technology to match photos, confirm "liveness", and mitigate identity fraud

RightID is a separate add-on tool that seamlessly integrates with your existing First Advantage solutions as well as other industry-leading employee management technologies.

RightID™ technology is patented, NIST (National Institute of Standards and Technology) certified, and ISO-2001 and SOC-2 certified.
